Section 1: Description of Indicator, Implementation and Scoring

Method to be Used	National or Sub-National Representative Survey
Introduction	Indicator 4C captures perception of tenure security among men and women who live on community land
Source of Methodology	PRIndex
Data Needed	PRIndex will collect raw data from a nationally representative survey implemented in Senegal in 2018. Specific questions from this survey will be used to calculate Indicator 4C.
Definitions	Implementation of 4C will depend upon the data collected in the PRIndex survey. Below you will see the relevant questions for Indicator 4C, according to sections of the PRIndex survey. The data from these questions will be aggregated at national level and shared with the in-country Dashboard lead for scoring.

How to Derive Dashboard 1B from PRIndex Survey	Overview	Below you will see the PRIndex questions, by section, that will derive Dashboard Indicator 4C. We still have to confirm how this data will arrive and thus, how they will be scored.
